29 Dec.: 1928

Mr. R. Cyril Lockett presents his compliments to the Editor of the American Numismatic Society & is very much obliged for the Monograph on "The Coinage of Aegina" by Sam.l R. Milbank, the reading of which has given him the greatest interest.

19th February, 1929

Mr. Richard Cyril Lockett, J.P., F.S.A.,
58, Cadogan Place, London, S.W.1

Dear Mr. Lockett:

One of our members has been gathering material for a classification of the Euainetos decadrachms, and Mr. Newell suggests that you must have several of the varieties in your collection. Would you be so good as to list these for us; if they have been reproduced, a citation of the reference is all that is necessary. If, however, you have pieces which have come from a hoard without being published, we should, of course, be greatly indebted if we might have a cast of such.

Very cordially yours,

Secretary

2 July 1929

Dear Mr. Noe.

Many thanks for your letter of the 29th Ult which I have not answered before as I have been troubled about recently. I am sorry to say I am unable to send you cards of any of my cows at present as my collection is stored away. I have very few of Metapontum with incuse reverses but am strong in

other issues particulary the female head series - You mention "double eagle" types but I rather think you are still working on the incuse reverse series

Yours very sincerely

W. Lyle Tockett

R. Cyril Lockett, Esq.,
58, Cadogan Place,
London, S.W.1, England

Dear Mr. Lockett:

Thank you very much indeed for your letter of July 2d. I have quite finished with the incuse series of Metapontum coins and there is no hurry about having casts of the others; but because of the difficulties through the close similarity in many of the female head series, I should greatly appreciate your coöperation if you would send me either casts or, when the coins have come from sales in which they have been illustrated, the citation involved.

Very sincerely yours,
